### **DAS to Distribute and Recommend TerraCair® Ultrapure DEF**

February 25, 2010— Terra Environmental Technologies Inc. (TET) has signed an agreement with DAS Inc. (DAS) under which TerraCair® Ultrapure DEF (TerraCair)<sup>1</sup> will be distributed throughout DAS' U.S. network. DAS will supply TerraCair to its network of travel centers and truck stops as its recommended DEF product.

"TET's commitment is evident in its willingness to guarantee TerraCair quality from manufacturing plant to tanker to customer vehicle," says Les Willson, Vice President of Purchasing for DAS. "We are dedicated to offering excellent products and services. TerraCair DEF is our recommendation for our customers because of TET's rigorous supply chain oversight from their plant production facilities all the way through to the vehicle's DEF tank."

This agreement, along with Terra's tanker fleet, rail car transportation, manufacturing capabilities and additional distribution partners, makes TerraCair readily available throughout the U.S. and Canada.

TET has the flexibility to ensure quality and supply by sourcing TerraCair from a number of Terra Industries Inc.'s six North American nitrogen products manufacturing facilities.

As a leading North American DEF producer, TET has developed a complete supply chain solution that includes manufacturing and distributing the product, recommending DEF-compatible dispensing equipment, offering financing options and providing field services and employee training.

TET also provides the DEF factory fill and is the dealership choice for Daimler Trucks North America LLC; Volvo Group North America, Inc.; Mack Trucks, Inc., and Ford Motor Company.

1. Under the Clean Air Act, all diesel vehicles produced in the U.S. beginning January 1, 2010, are required to meet more stringent emissions standards. Most manufacturers are accomplishing this by using SCR technology. DEF is a liquid urea solution that, when used in conjunction with SCR, converts harmful emissions to pure water and nitrogen. TerraCair® Ultrapure DEF is an ultrapure urea solution whose quality is certified by the American Petroleum Institute.

*TerraCair is available in a variety of package sizes and dispensing configurations.*

### **About TET**

TET, a wholly-owned subsidiary of Terra Industries Inc., provides emissions control solutions, offering nitrogen-based products (reagents) including anhydrous ammonia, ammonium hydroxide, and liquid and dry urea; and a broad range of technical, engineering and logistical services. TET serves two discrete customers: stationary and mobile. Stationary customers include coal-fired power plants and other large industries seeking to reduce NOx emissions. Mobile customers include all businesses involved in supplying diesel exhaust fluid to consumers who use it to reduce harmful emissions from the exhaust stream of diesel engines, including automotive fluid distributors, truck stops, a variety of retail outlets and original equipment manufacturers. TET was incorporated in 2007, and has access to the full range of Terra resources. Terra Environmental Technologies' Web site is at [www.tet-terra.com](http://www.tet-terra.com).

### **About DAS**

DAS provides goods and services to travel centers and truck stops. DAS has more than 400,000 square feet of warehouse space with state-of-the-art picking and packing systems in Elizabethtown, Penn., and Salt Lake City, Utah. DAS also has shipping points on the east and west coasts.
