Reliable, Effective Solutions for Meeting Clean Air Objectives

Sapp Bros Travel Centers Select Terra Environmental Technologies as Exclusive DEF Provider

February 25, 2010—Sapp Bros Travel Centers have selected Terra Environmental Technologies Inc. (TET) as their exclusive supplier of diesel exhaust fluid (DEF)¹.

Sapp Brothers is currently stocking TET's branded DEF—TerraCair Ultrapure® DEF—on the shelves of their Travel Centers in 2.5-gallon packages, and will provide island dispensing of the product in the near future. Sapp Bros has 16 Travel Centers, which offer its customers clean restrooms, diesel fuel, gasoline, full- and quick-service restaurants, heavy duty truck maintenance and free WiFi, among other services, in Utah, Colorado, Wyoming, Nebraska, Kansas, Iowa, Illinois and Pennsylvania.

TET has the flexibility to ensure quality and supply by sourcing TerraCair® Ultrapure DEF from a number of Terra Industries Inc.'s six North American nitrogen products manufacturing facilities.

As a leading North American DEF producer, TET has developed a complete supply chain solution that includes manufacturing and distributing the product, recommending DEF-compatible dispensing equipment, offering financing options and providing field services and employee training.

TET also provides the DEF factory fill and is the dealership choice for Daimler Trucks North America LLC; Volvo Group North America, Inc.; Mack Trucks, Inc., and Ford Motor Company.

1. Under the Clean Air Act, all diesel vehicles produced in the U.S. beginning January 1, 2010, are required to meet more stringent emissions standards. Most manufacturers are accomplishing this by using SCR technology. DEF is a liquid urea solution that, when used in conjunction with SCR, converts harmful emissions to pure water and nitrogen. TerraCair® Ultrapure DEF is an ultrapure urea solution whose quality is certified by the American Petroleum Institute.

TerraCair is available in a variety of package sizes and dispensing configurations.

About TET

TET, a wholly-owned subsidiary of Terra Industries Inc., provides emissions control solutions, offering nitrogen-based products (reagents) including anhydrous ammonia, ammonium hydroxide, and liquid and dry urea; and a broad range of technical, engineering and logistical services. TET serves two discrete customers: stationary and mobile. Stationary customers include coal-fired power plants and other large industries seeking to reduce NOx emissions. Mobile customers include all businesses involved in supplying diesel exhaust fluid to consumers who use it to reduce harmful emissions from the exhaust stream of diesel engines, including automotive fluid distributors, truck stops, a variety of retail outlets and original equipment manufacturers. TET was incorporated in 2007, and has access to the full range of Terra resources. Terra Environmental Technologies' Web site is at www.tet-terra.com.

About Sapp Bros

Sapp Bros Travel Centers, headquartered in Omaha, Neb., was established in 1971. Sapp Bros Travel Centers operates in eight states and is known for clean facilities, convenient locations and setting the standard for quality customer service.
